SUMMARY

Software engineer completing a Bachelor of Science in Software Engineering at Western Governors University (expected November 2026). I spent three years as an intern at Morningstar building Vue and Python applications for financial analysts and investors. I also worked in IT support, troubleshooting enterprise applications and SQL databases.

EDUCATION

Western Governors University Expected November 2026

Bachelor of Science in Software Engineering

Organizations: Break Through Tech, Women in Computer Science, Women in Science and Engineering

Relevant Coursework: Advanced Java, Java Frameworks, Back-End Programming, JavaScript Programming, Front-End Web Development, Advanced Data Management, Software Security and Testing, Advanced Software Engineering, User Interface Design, Version Control

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, Java, C, C++

Front-End: Vue, Angular, HTML, CSS

Back-End and Data: REST APIs, relational databases, Jupyter Notebook, Power BI

Tools: Git, Docker, CI/CD, Jira, ServiceNow, New Relic

EXPERIENCE

Software Engineer Intern | Morningstar Inc. | Chicago, IL May 2022 – September 2025

- Built Vue and JavaScript components that let financial analysts propose pillar scores and ratings for peer review in internal enterprise software.
- Built interactive applications in Python and Jupyter Notebook that made machine learning data easier for investors to explore.
- Designed a Vue application about investor bias. I wrote the algorithms that calculate each user's results and built the charts that display them.
- Worked with engineers and business stakeholders to decide what to build for financial analysis workflows.

IT Specialist | Dentologie | Chicago, IL December 2024 – October 2025

- Troubleshot enterprise applications and SQL databases, fixing issues weekly so staff could reach patient and billing information.
- Debugged application problems and explained the fixes to non-technical staff in a distributed environment.
- Checked data accuracy across insurance and billing systems, and kept internal scripts and documentation in Git.

Manager | Pure Dental Spa | Chicago, IL October 2025 – Present

- Run daily operations, resolve issues, train team members, and coordinate between clinical and administrative staff.

PROJECTS

Resume Review github.com/NTaiymCS/ResumeReview

JavaScript, HTML, CSS, Mammoth.js

- Built a web app that reads DOCX resumes and compares skills, education, coursework, and experience against a job description.
- Added job requirement breakdowns and application tracking, and the app emails a reminder when it is time to follow up.

Interactive World Map github.com/NTaiymCS/Angular-World-Map

Angular, TypeScript, World Bank API

- Built an Angular app where users select a country on a map and see data pulled from the World Bank API.

CERTIFICATIONS

ITIL Foundation, WGU Back-End Developer, CompTIA Project+
